

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove started on a cross country RV voyage. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

While on their trip, John spent time conversing with former business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John discovered a vast marketplace for a product that could quickly and securely elevate individuals in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they built and sold the first JLG aerial work platform. The company incorporates many of the basic design elements of that original lift into existing designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into quite a few international marketplaces and continues to cultivate contemporary machines to guarantee that customers are able to become safer and more efficient within their workplace.
