

Aerial Work Platform

Aerial Work Platform - There are lots of attachments used for forklifts that can be used to help expand the functionality of your lift truck and allow you to carry stuff, handle materials with less effort or to complete clean-up tasks.

A lot of the accessories are specifically designed to fit on the blades themselves. Blade extensions for instance, are used whenever you need much more blade length, which increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular accessories are another type used when transporting rolled material to be able to ensure it does not roll off of the traditional flat blades.

Lifting accessories can be pivoting and telescoping crane attachments. They are available in various kinds. These accessories are usually used for transporting lumber, metal bars, poles or any kind of bulky stuff. Other attachments like for example various styles of hooks and hook plates are available to be able to pick up items using a chain or sling. Slab lifters and magnetic filters are other things that can be used with hook accessories. Slab lifters are specialized attachments that are designed for picking up a variety of materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which connect to your lift truck to be able to make transporting rolls of carpet much easier. The attachment hooks onto the forklift's forks and has a pole which goes through the center of the carpet roll.

There are various types of lift truck accessory designed for facility maintenance like for example snow forks. These industrial blades can be attached to front end loaders and meant for moving materials such as dirt, and mulch as well as snow. Other common cleanup accessories comprise standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the lift truck forks hook onto for sweeping big spaces like factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal debris such as on shop floors for example. Sweepers have widths up to sixty inches and this surface area makes clean up fast and effortless.

A material spreader is one more lift truck attachment that is normally utilized at facilities. These spreaders are useful for a variety of applications like for instance spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Another optional lifting attachment are work platforms. These could be used by a lot of different businesses day by day. Platforms may differ in size from 36" x 36" to up to 60" x 60". Several units may be accessible and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location utilizing the lift truck. Larger platform models have added space for employees to bring tools and other essential objects for the task. Normally work platforms are constructed of poly material or steel.
